STEVE COTTER SIGNATURE STEEL COMPETITION KETTLEBELL

In addition to meeting international competition standard dimensions, including the rare 35 mm handle diameter, the Signature Steel Competition Kettlebell features a unique hard-wear, universally textured surface, especially conducive to taking and holding chalk for extended bouts of performance.

Add to that the smallest weight increments available anywhere, and you've got the most serious line of competition kettlebells in the world.

Features:

- Designed with kettlebell authority Steve Cotter

JOHN BROOKFIELD

John Brookfield is an internationally known Strongman and Strength and Conditioning coach famous for his feats of strength, physical endurance and his ability to create physical training systems which are used by athletes, trainers and coaches world wide. John has been seen on many television programs such as Regis and Kathie Lee, Good Morning America, The Today Show, Vicki Lawrence and the Statler Brothers.

John has created physical training programs such as the Chain Reaction Program, Beyond Bodyweight training and Brookfield's Barrel training. However, his most famous training program is the Battling Ropes Training System which is now seen everywhere including countless television commercials which show the ropes being used by someone. The Battling Ropes are extremely eye catching, however there is much more than meets the eye with John's Battling Ropes System.

John is a popular speaker and presenter and has been a favorite for many years at the Perform Better functional training Summits. He works quite often with NFL teams, Military Special Forces Units and Police Squads. John has performed many world records when it comes to sustaining work capacity over time. Even though John is in his fifties now he just recently set a new world record for pulling a forty thousand lb. semi-truck the distance of one full mile with the help of his truck pulling partner Kirk Nobles. Together they pulled the truck on the one mile course in 50 minutes and 54 seconds without the use of any pulling ropes. This is an incredible feat especially considering the last 1/4 mile was uphill.

Even though John processes great wisdom and knowledge when it comes to physical training he is well known for his polite laid back nature and his ability to make everyone feel at ease and comfortable during his training courses.
